

Risk-Free BESS

8 FREE WAYS TO GET INVOLVED.
WHAT'S STOPPING YOU?

Create a 90- second career video using your smartphone. The questions you need to answer are on our website, and you can see examples of other people's videos on our YouTube channel

Record a podcast under the heading of 'Opportunities for Innovation'. Talk about any area of the sector that you think is in need of innovation. You can create your recording using the free software, Audacity, and we'll upload it to iTunes

Add to current projects with ideas, suggestions, inspiration or challenges for students. At any one time, BESS has approximately 15 live projects, so there's always something you can add to

Create a guest blog about an exciting project you've worked on. If you can add pictures, that's even better. The only caveat is that you must feature the work of at least one other construction company, separate from you, that's involved as well

5 Deliver a live Periscope broadcast from a site. Just let us know where and when so that we can promote it. Make sure you feature the jobs involved, and the skills that those jobs require. And no swearing!

6 Share your project photos on our Snapchat and Instagram channels. Or send them to us, and we'll do it for you. We also love Snapchat Stories, i.e. a series of snaps that make a short video

7 Share the presentations, talks and assignments that you've already delivered to local schools, so we can let young people all around the UK benefit. You can upload content, or a video of you delivering the content, to our Facebook page

8 Post an internship, work experience placement or other vacancy on our Opportunities Board. We can help you filter the Social CV applications, and we can help you set challenges to shortlist even further
